### Plant operations

- What good looks like:
  - all plant operational and complete
  - all access routes safe and well maintained
  - equipment regularly serviced and maintained
  - fueling areas have soft lids and fuel containers in place
  - loading areas have covers on mobile equipment

macegroup.com

**M-SFSN-VS034p** Paper poster (A2)  
420mm X 594mm £12.48  
(may need poster frame below)

### Skin care

- What good looks like:
  - skin protected before starting work
  - correct hand protection worn for the task
  - hands washed thoroughly before eating
  - skin care applied after work

macegroup.com

**M-SFSN-VS035p** Paper poster (A2)  
420mm X 594mm £12.48  
(may need poster frame below)

### Work in occupied buildings

- What good looks like:
  - logistics well planned to cause minimum disruption
  - access routes clearly signed and segregated
  - well ventilated and illuminated working environment
  - services are clearly identified and isolated where possible
  - only work required and controlled
  - dust creating activities minimised and controlled

macegroup.com

**M-SFSN-VS036p** Paper poster (A2)  
420mm X 594mm £12.48  
(may need poster frame below)

### PPE

- What good looks like:
  - minimum five-point PPE is worn correctly and is compatible with other PPE
  - PPE is in good condition
  - the wearer has tie and midline protection
  - additional or specific PPE required for the task is worn correctly

**M-SFSN-VS037p** Paper poster (A2)  
420mm X 594mm £12.48  
(may need poster frame below)

### Asbestos management

- What good looks like:
  - If suspected material containing asbestos is uncovered, work is stopped immediately
  - all relevant health and safety training in asbestos management
  - demolition and refurbishment survey available for all sites to be accessed
  - survey report by UKAS accredited company

### Spill response procedure

**Stop** → **Contain** → **Notify**

**Stop**

Stop work immediately.  
Prevent any more material spilling if safe to do so.  
(E.g. right an oil drum, close valves)

Eliminate any sources of ignition. If safe to do so prevent any more material spilling. (E.g. right an oil drum, close valves)

**Contain**

Contain the spillage by using spill kits and drop trays immediately or by using bunds of earth or sand.

Check the spill has not reached any nearby drains or manholes, watercourses, ponds or other sensitive areas. Bund drains or manholes to stop the substance entering the drainage system.

Ensure that any spill kit contents are replaced after use and the used contents are disposed of as hazardous waste.

**Notify**

Notify Mace immediately giving the following information:

- Whether the substance has entered a drain or watercourse, or is affecting the environment
- Substances involved
- Location
- Reason for the incident
- Quantity involved
- Controls implemented

**Major spillage:**  
Cannot be controlled; pollution has entered, or could enter a drain or watercourse. Report to Mace without delay, and record on YellowJacket.

**Minor spillage:**  
Can be controlled; pollution has not entered or cannot enter a drain or watercourse. Report on YellowJacket.

### What's in your spill kit?

Spill kits must be appropriate and able to deal with any kind of spillage. It should contain:

<b>Absorbent granules</b>	For use on hard surfaces where spilled oil has collected.	<b>Plastic bags</b>	To dispose of used granules, pads or booms safely, as hazardous.
<b>Absorbent pads</b>	For wiping oil off a surface, e.g. a drip tray or fuel hose.	<b>Bin with lid</b>	(Or other large enough container) - to store the spill waste, granules, pads and booms.
<b>Absorbent booms</b>	To prevent oil from moving on either a hard surface or on water.	<b>Shovel</b>	To safely pick up used granules.
<b>Gloves</b>	To safely handle used pads and booms.	<b>Coveralls</b>	For personal protection.

Should you have any questions relating to your project emergency response please speak directly with the project environmental co-ordinator.

### Are your chemicals labelled correctly?

New CLP (Chemical Labelling and Packaging) regulations have replaced the CHIP (Chemical Hazard Information and Packaging) regulations across all EU states including the UK. Although the CLP hazard pictograms are very similar to the CHIP hazard symbols, they have a new shape, design and colour, and more have been added.

#### What you need to do

All projects and suppliers to carry out the following actions:

- Ensure all chemicals are supplied with new labels and suppliers are notified of any out-of-date labelling
- Update COSHH assessments to reflect the regulation changes by 1 January 2016
- Ensure workers are briefed with adequate information, instructions and training on the new regulation and symbols

Please speak to your chemical suppliers if you have any questions regarding the changes.

**mace**

**Do not attempt to  
lift heavy loads  
single handed**

mm Foamex; 660mm X 460mm  
13.73

A red rectangular sign with white text. At the top left is a small logo with the words "Safety first." and "Second nature." above a stylized flame. At the top right is the "mace" logo with its signature colorful bar icon. In the center is a large red circle containing a white "no smoking" symbol (a cigarette with a slash through it). Below the circle, the word "No smoking" is written in a large, bold, black sans-serif font. Underneath that, in a smaller black font, is the text "It is against the law to smoke in these premises".

**No smoking**  
It is against the law to  
smoke in these premises

**M-311**

No smoking except in...  
Safety first. Second nature.

**No smoking except in  
designated areas**

The sign features a large red circle with a diagonal slash over a cigarette icon, indicating that smoking is prohibited. The text is arranged in three main sections: the M-311 code at the top left, the general instruction at the top right, and the detailed safety note below it. The bottom section contains the main message in large, bold, white font on a red background.

5mm Foamex; 660mm X 460mm  
£13.73

M-315 No cars allowed on site

Safety first. Second nature.

mace

No cars allowed  
on site

A composite image for M-317. The top portion shows a 'No Entry' road sign with a red border and a diagonal slash. To its left is a yellow box containing the text 'Safety first.' and a black box containing 'Second nature.'. The bottom portion is a large red rectangular area with the white text 'No entry' centered in a bold, sans-serif font.
